

ENTRY GUIDE

2026

BUILT
DESIGN
AWARDS

AATMA MANTHAN MUSEUM
Sanjay Puri Architects
@Vlinay Panjwani

The BLT Built Design Awards recognize and honor the expertise of all professionals involved in the realization of outstanding projects, on a global basis — from architecture firms and interior design experts to Landscape Architecture ventures to construction products and project management innovators.

Selected by our esteemed jury of architects, designers, developers, academics, and leaders in the fields of architectural, interior design, and construction, the annual winners will receive the BLT trophy, extensive publicity showcasing their designs to an international audience, and more.

Why you should submit?

1

Worldwide

The award is open to submissions on a global level, accepting entries from companies and students from all around the world.

2

International Exposure

Get published when winning the BLT Awards; our team will support your winning projects with marketing campaigns, press releases, and interviews.

3

Customer Growth

Generate exposure to an expanded architect and interior designer market, targeting developers and investors.

4

Innovation

The BLT Awards is looking at innovative and sustainable projects, winning is proof of your visionary mindset.

5

Team Recognition

Receiving the BLT Trophy will foster recognition from industry leaders and potential clients. Productivity, motivation, job satisfaction, and morale will all be boosted.

6

Website Profile

A stunning profile displaying the winning projects and completed work, alongside the company and designer's details.

BLT Awards annual programs

1 **Architectural Design of the Year** is awarded for single projects (conceptual designs, in-progress, or completed projects) created in the last five years; they must be aesthetically impressive, showing clear evidence that today's challenges have been taken into consideration — such as social impact, environmental friendliness, energy utilization etc. The prize is given to individuals and/or firms who have pushed the boundaries of great architecture! This prize is open to both professionals and students.

2 **Interior Design of the Year** awards talented designers whose projects push boundaries and demonstrate clear evidence that the many challenges of today's world are taken into consideration. These challenges include how to increase the quality of personal interactions and how to facilitate these interactions, in order to connect and collaborate in spaces designed to merge lifestyle with work style. This prize is open to both professionals and students for projects created in the last five years.

3 **Landscape Architectural Design of the Year** is awarded to the most exceptional landscape design exemplary in creating ecologically sensitive, exceptionally resilient and forward-thinking environments with a great impact on the community. The award recognizes planning, design, management, and nurturing of the built and natural environments. This prize is open to both professionals and students for projects created in the last five years.

4 **Construction Product Design of the Year** recognizes the most outstanding products and materials, whether durable, sustainable or smart. Every architect and designer knows it takes spectacular construction products to make their design vision a reality. From roofing to solar panels, glazing façade to flooring, and electrical systems to the concrete surface, as long as your product is part of a building, it is eligible for entry. This prize is open to professionals only.

GETTING STARTED

Register and complete your profile information.

Pick your experience level, add your company or school details and create a password.

Validate.

Once you have registered; you can run through the steps, save your progress then come back to complete your profile if needed.

JUDGING CRITERIA

The evaluation process for entries to the BLT Built Design Awards is based on various judging criteria. These are constantly adapted and updated, in response to new technical, social, economic, and ecological requirements. The criteria are not comprehensive and not all criteria are applied to each project, they simply provide an orientation framework and basis for judging — which is complemented by each individual juror's expertise and socio-cultural background.

- Aesthetics — form, shape, color, texture, finishing, the material used, etc
- Innovation — does the design provide something new to the market or supplement/improve an existing structure?
- Practicality / Functionality - ease of cleaning, safety, maintenance, User experience...
- Ergonomics — How is the interaction with the client? Space optimization?
- Durability — the quality and longevity of the design and architecture
- Impact — the benefit delivered to the client and/or society by the Design
- Integration — about the integration of the project to its local environment
- Ecological compatibility — potential environmental and/or ecological impact
- Emotional quotient — in addition to fulfilling its practical purpose, does the building create a sense of enjoyment, satisfaction?
